#### <NOTE>

- If you need 110v, you yourself have to prepare AVR or current transformers separately.

- When installing sensitive equipment, you need to observe its own safety conditions.

- Electricity supply for the booths will be cut off automatically 1 hour after the exhibition each day.

Should you require the electricity for 24hours, you must inform the Korea E & I.

- Use of multi-plug as an alternative to the socket may cause fire due to an excessive load. Hence for the safety reasons, all types of electrical works must be done by the designated electrical companies.

- Exhibitors should apply for the correct voltage of electricity supply as well as lighting and electrical appliances. Should there be a fire due to an excessive use of power, the exhibitor must compensate the organizer and other exhibitor that are affected.
